

4 components of a logger

1. Logging
2. Handlers
3. Filters
4. Formatters

Logging

- 5 levels of logs in python.

Handlers

- Where to show the logs.

Filters

- Filtering types of logs to save.

Formatters

- Format of the logs.

Steps

1. Create logger
2. Create handlers
3. create formatters
4. Add formatters to handlers
5. Add handlers to loggers
